Frank's whole method of describing clothing 141 very odd. For example, if there were such small shirts in bag (I do not remember this) + large T-shirt, the obvious suggestion is not an affinity for "snug" shirts but of two men. Why not an affinity for non-striped shirts? Do he assumes only one man, "The man they were hunting."

There also another apology - he has to this present not missed apologizing for and puffing up every official. Here he leaves for the fact that the Main airport was main closed - no search - no attention to it at all. I have a friend who was then there.

142 "armed with a sketch of Willard." Is this not first mention of sketch? If it is, who no genesis?

143 - using this McFerrin story line is a prejudicial literary device esp in no later mention of swearing by FBI

144 Ref to Mafia without context but shows he knows whole story - not just "businessmen" and connection not through priest, if at all, only. Or, does one suspect all Italian-American businessmen are Mafia? Esp saying it was "sure" that McF would say nothing that would ~~have~~ hurt his business is a dirty, anti-black lie, for McF has a long record of saying + DOING - what did he know would hurt his business + could cost him his life. This is the Hunt method, subtle anti-black writing for receptability in south.

I am not certain of the time, coal it could have been later, but Chastain told me the FBI Bureau chief/deliveryboy kept McF in a hotel room for a week, not 2 hours, as this leaves it pp 146
147-8. As I recall it, Thompson typed this. He played me a tape that could be this, & insisted to me I should have the kind he had one hidden, & talked all the time so I could not pay attention to the tape. Later asked for a dub so I could check it & got no response.
148 "Benavitas"? Why not Benavides, & what is that in spanish?

This whole passage on Thompson appears to be edited, to have been written early & to have come not from Thompson but from police files, for it does not include reference to his being a State Legislator or, as was reported in the press, a member of a Legislative committee planning (2/7,) an investigation.

This story following McTeer is a clear attempt at Advice, Lawyer-like. More so with the Jim's Steak House story = Everybody is out + the cops/FBI checked everything out. But the bit about counterfeit Travelers Checks is interesting. That is one of the few things one could smuggle into Mexico. But with a sample, no prints? (ask for identification)

There is an interesting aspect to the Bonnevelle story that Frank missed & he should not. They are the kinds of stories that would discourage police interest in them yet they are precisely what seems to have been the case: a pro did the job & there were gang/underworld connections. This would seem to indicate that the defense should be interested in the prosecutors' stories & any investigation of the American Express check, esp. of prints & if lifted, to whom. If anyone, proceed.

More apology - 157 on the sketch & the existence of the second sketch & the FBI's statement on it and the "Frenchy" resemblance. Note that Reis quotes Mrs. Lean Memphis's usual as having passed forged card to the "look-alike"

160 - did he sign fictitious name slip?

Note Frank said on KPFK that the guilt-signature appeared in a sports magazine also and it is in book.

Marie Martin - says cousin of Charley Stein. Not sister? No ref to her record, yet he saw her in Calgiro with Moo, who knew it & her.

163 - More apology - makes it appear - says - that trip to N.O. just to accommodate Stein's, pick up Reis's bids. See on 164, 167

Quite a dossier on + picture of drunk - all but his long arrest record on gun-pimping + marijuana charges (hits up on 169)

This prompts me to note that his mother seems to be to top only good of everyone - Bye Ray.

164 On dictation of Stein interview (C), pvb. did not while persisting in the probable falsity that This trip was prompted by the Stein woman, here is another example of the Frank method of covering himself (as in his response to me on the B2 referring to the 107 footnote) usual ref to Ray also having some business there. The intent + the effect is to hide all suggestions of conspiracy or collaborations

165 is there any record of Ray having Kodak camera or such a buy?

(Frank told me he had found errors. Should quote for them)

Much of this is undoubtedly Lomax's pov also from his notes. No audit or ack. to Lomax

166 - no glasses. Ray had gotten glasses in B'ham earlier.

167 While Eaton loudness of Ray "gun" name seems to have no point.

170 Ref to conspiracy makes no ref to not dropping it after arrest + conviction

172-3 This staff of Garners includes more than O'Neill having reported + more strongly suggest he expected to return + be living there again.

173- This but about a bat 3 of 24 prints being useless for identification: can this be of Ray only + does it include Mrs, identifiable prints? And on Frank's words, this includes only "he had run down from [illegible] his!" How about those lifted from the room, bathroom, car, etc?

176- ref to Fithy- does not include that he was known paranoid + that in explanation of this he was harassed by means including helicopters until he was driven from town.

178-9 This but on [illegible] if un fabricated says loud + clear that Frank's has FBI report defense could have + could be used for Grinder F-01. On the substance I think John has a good memory, better than Jerry, + I don't think he forgot when he saw Garner. However, they all have a different, distorted manner. On Monday 5/8/20 ended our interview so he could meet with Jerry

and he said it didn't make an difference if he got to see Jerry or not. Jerry had a seminar at 11 o'clock. But Jerry is staying over in St. L. to take Carol & Albert Thur & Pat Jr. is coming to St. L to take her. I would also say it was not impossible that Jerry used Phil's permit & I know Phil without need he uses false names. He did when we checked into the Baltimore Hotel Tuesday night (where I learned last night when Carol tried to call him & had to call me). But when we checked in, a bell-hop recognized him as a Ray, he told me.

183 Typical of Frank's method & ego & lack of acknowledgement that he had used Lomax's notes etc. Frank has mentions his meeting at (interesting, not a the late Louis Lomax) where they first met.

192 If Frank is right about the galt segregating this could account for how someone got it & gave it to Ray, but not for how Ray got it. Probable Frank source: public. Galt was never quoted on this. With no indication A. Ray's interest or access to these undescribed "small publications" (Frank told me on the Bill

Fields show they are spies magic mike),
This would be a lead to his associates.
The travel account makes it clear
Ray would not have gotten these identities
on the trip unavailable.
193 ~ Time in writing: Butler not "dead" but
dead long before publication
203 ~ Cargene guide of Ray: is this improper? Does it violate confidentiality of client? If so, would n should something be done? Continues on 204, where I wonder from Mayo account is Hanes was first choice? Thought Bailey was. Replicated 203 + 204
205 Even Frank can't avoid emphasizing the mercenary in Hanes
206 But omits last part CIA employee and why he left (73)
(13 but reports Hanes belief CIA would have been in a copyright on book 4)
207 note last sentence in Cayo ltr to Hanes, "in the event you can't participate in Texas," & thinks he meant more than he said, and his subsequent hosting shows importance on Texas counsel.
208 ask Hanes for NSRP response; quite possibly that before this JFK or John had been in touch. (Says more had heard of him.)
209 Bailey's response not a turn-down but encouraging that the only lawyer Foreman had mentioned by name as those to whom Ray wrote!

Same date as 203, but does not say anything re CIA

ask Jenny for Bailey's letter if she has.

210 Beaming on what Frank told me + Jenny confirms, that he had wrestled quite a bit, not "Sam pressed him-self but Boy would not go down alone; those who tasted him would go down with him". Frank prophesies to use "back", which is weaker than "put" or "laid"

212 - Booth "man of great dignity", not reformed alcoholic - doesn't fail to wear overcoat but Boy

213 Booth also behaved unspiritually at first - it seems that all minds don't until a practical problem comes up.

214 Booth in making out his advance of Boy's return: if he didn't remember his own case, perhaps Bissell would have reminded him - if behind the paupers funds reports

Why should he want to reduce chances of an appeal?

How is it "their" decision that might be reversed? Does the jury decide a guilty or innocence? Or was he then looking to appeal? Why would an innocent decision make many feel a "taint" town? Does what happened because reflection of Booth's community?

Frank should be read as the basis of improper questioning in any deposition.

215 - obvious answer to F.U. & defense objection. I would imagine that when there a "stipulation" is required if one is not offered by defense. And so far as not being paid in any thing else, Ray was. "not the law by peters Medicine Federal Government"

214 Why did prosecutors have to determine if "Ray had felon convictions" if there was no such indictment etc with it impossible to try Ray on any new charges?

218 - From the moment of Ray's capture, Foreman started to help of Hoover, Ray & the case.

221 - Huie's deal is clearly for Ray to talk to Huie & Hanes to conduct work it.

222 representation of Huie not only debunked by plea among other things, Lane's Hand dishonesty. And Huie & his attorney commenced w improper motives.

Again it is clear that Frank is determined to discredit everyone but Ray & J Frank Pate is marked, esp when he lies on purpose, to discredit contract process.
